# Caspian Data Lake

## Deep diving for treasure

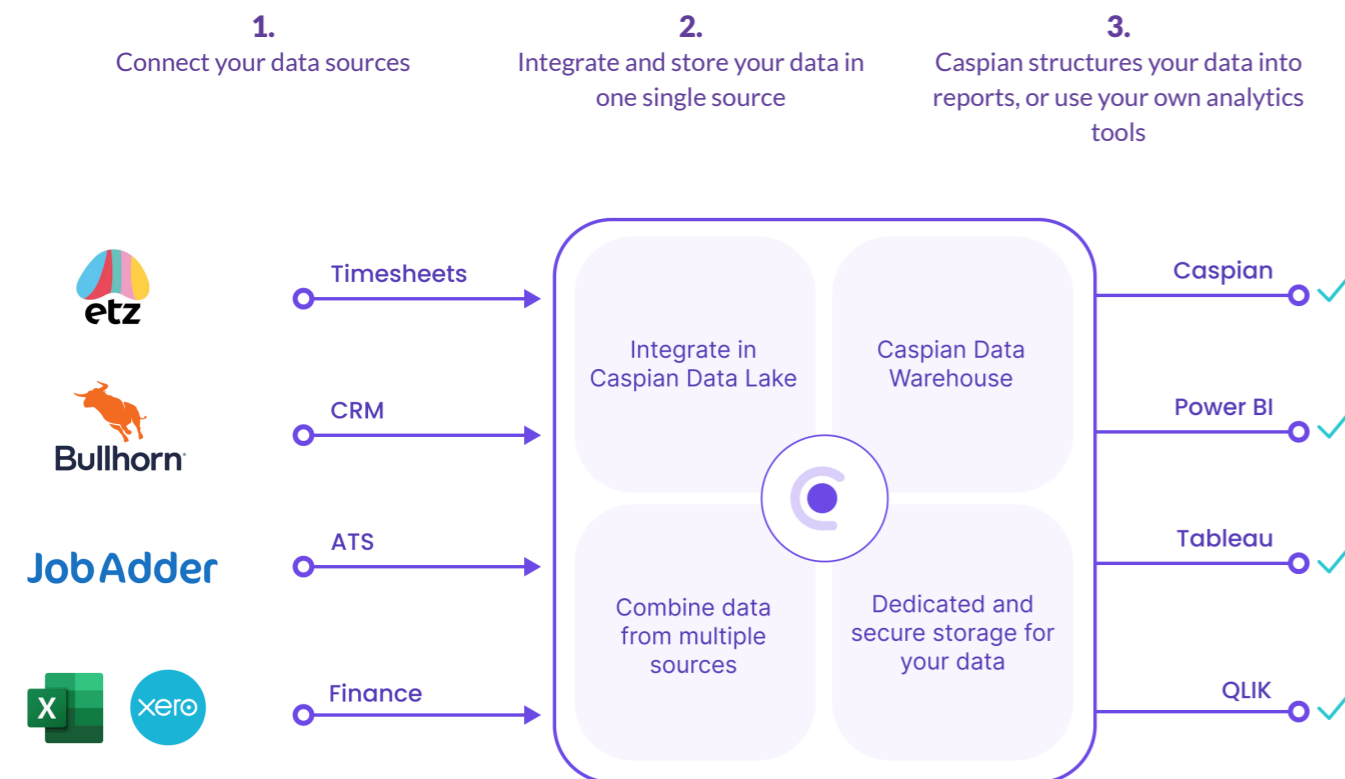

Caspian is the latest innovation from the founders of ETZ, built on Big Data technology, providing the benefits of Big Data technology for the recruitment sector.

The Caspian Data Lake takes your agency's ETZ data and combines it with all the other information sources from across your software stack, to create a centralised data lake.

Caspian analyses and structures the information into a data warehouse, making it relevant and easy to use across your business.

Caspian provides reporting, allowing you to combine elements of data that would otherwise be difficult or impossible to look at in a meaningful way.

## How it works

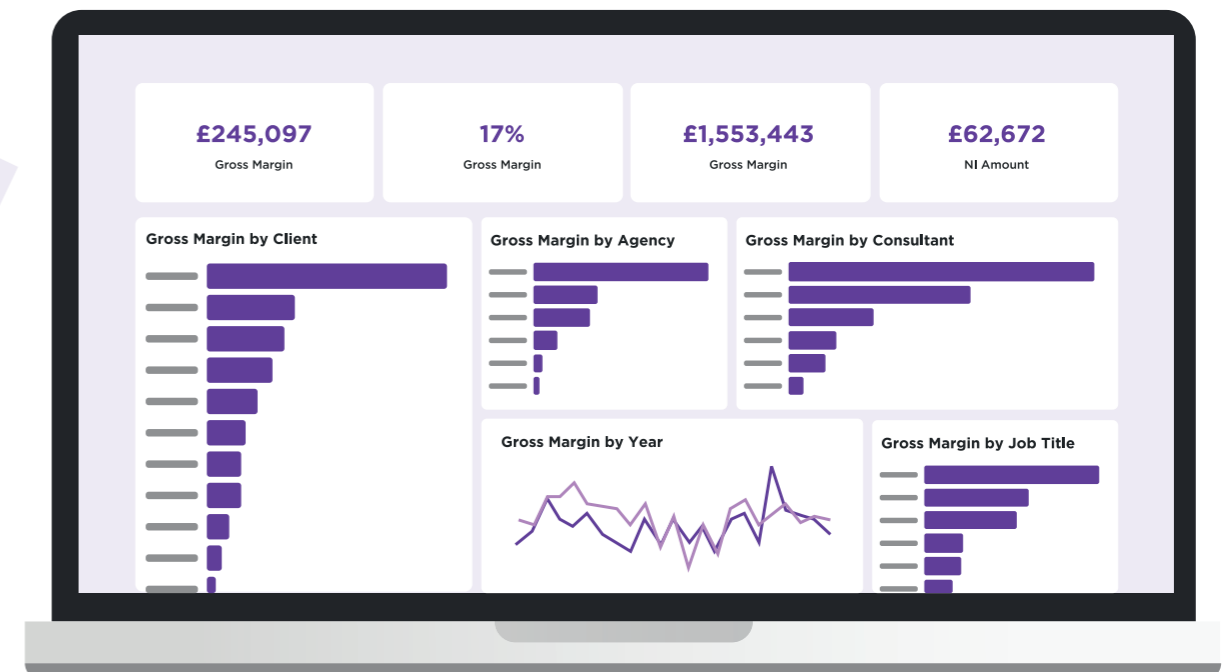

# Caspian Reporting

## Getting more from your data with Caspian

Caspian radically boosts the ability of agencies that use ETZ to identify opportunities that would otherwise be missed, providing a powerful source of competitive advantage.

Caspian provides a dashboard that provides KPIs at a glance including figures for Gross Margin (cash amount and %), timesheet summary statistics and Gross Margin for each candidate.

## Standard report templates include:

- Consultant Commission
- Invoice And Payment Summary
- Purchase Invoice Day Book
- Sales Invoice Day Book
- Split Margin
- Timesheet Chaser
- Timesheet Hours
